DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,6 & 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Preston et al (US Patent No. 5,682,750). Preston discloses a self contained delivery station for liquid natural gas (LNG) and comprising: a storage tank (2), a pump (28), and meter (30) submerge in LNG within the tank, an outlet (31) of the pump (28) is connected to the inlet of the meter that is connected to a LNG delivery line (70) and a control valve (71) for restricting flow or thereby further metering of flow.

Allowable Subject Matter

Claims 2-5 & 8-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
